

Periods - Describe how elements are arranged in PERIODS (what do electrons have to do with it)?

Match these Periods with the properties of their elements:

- | | |
|----------|---|
| Period 1 | A) includes the gases that make up most of our atmosphere |
| Period 2 | B) includes Iron, Copper, and Zinc |
| Period 3 | C) contains the heaviest elements |
| Period 4 | D) the lightest known elements |
| Period 5 | E) 3 electron shells |
| Period 6 | F) includes Dysprosium |
| Period 7 | G) 5 electron shells |
